FIRE Accident

How to evacuate when fire accident occur

1. When you hear the warning alarm and the first announcement, you should start to get yourself ready.
 1.1 Turn off all electrical equipment, 1.2 Tighten your shoelaces, 1.3 Clear away any obstructions in your path and wait for the next announcement.

2. When the evacuation announcement is released, you must look for your department's signal flag and walk immediately to the fire exit, the safe means for escaping

3. You must quickly evacuate via the pre-determined direction that will lead to the secured assembly point.

3.1 If you have any guest or visitor, please take them with you.

3.2 The correct way to evacuate from a place with fire is to walk gently and carefully but quickly [Should not run as accidents may be incurred.]

3.3 During the evacuation, please take care of those who require assistance like patients, expectant mothers and disabled persons.

4. When you reach the assembly point, look for your department's signal flag and count the members.

4.1 Once everyone is confirmed, sit at the assembly point with your department. A representative will inform the number of members to the Safety Department.

4.2 Sit at the assembly point until the state of normalcy is announced.
